Titles

A

Accurate Predictive Emissions Monitoring System (PEMS) for an Ethylene Furnace, An . . . 19

Adiabatic Thin-Film Evaporation of Volatile Organic Compounds from Industrial Wastewater into a Natural Gas Receiving Stream 255

Air Emissions of Volatile Liquids Spilled on Sands 229

Analysis of Non-Isothermal, Wet Oxidation Reactor Data 48

Application of Inverse Fluidization in Wastewater Treatment: From Laboratory to Full-Scale Bioreactors 194

B

Biofiltration of Odors, Toxics and Volatile Organic Compounds from Publicly Owned Treatment Works 141

Biological Conversion of Hydrogen Sulfide into Elemental Sulfur. 234

Biological Elimination of VOCs in Biofilters 148

C

Carver-Greenfield Processes: Dehydration/Solvent Extraction Technology for Waste Treatment, The 213

Cost-Effective Treatment of Organic Sludges in a High Rate Bioreactor 135

D

Design and Economic Aspects of Activated Carbon Adsorption in Relation to the Effect of Dissolved Oxygen 128

Design for Pollution Controls Screening Alternative Technologies 69

Design of a UV Oxidation System for Treatment of TCE-Contaminated Groundwater 179

Development of a New Electro-kinetic Technique for Decon-tamination of Hexavalent Chromium from Low Surface Charged Soils. 166

Development of a Wastewater Treatment Process: Reductive Dehalogenation of Chlorinated Hydrocarbons by Metals. . . . 38

E

Environmental Partnerships: Opportunities and Challenges. . . 1

F

Field Evaluation of a Granular Activated Carbon Fluid-Bed Bioreactor for Treatment of Chlorobenzene in Ground-water 93

First Full-Scale Soil Washing Project in the USA, The . . . 108

I

Industrial Wastewater Pollution Prevention Study: Evaluation of Precipitation and Separation Processes, An 28

Innovative Uses of Specialty Ion Exchange Resins Provide New Cost-Effective Options for Metals Removal 208

L

Life Cycle Assessment Applied to Process Design: Environmental and Economic Analysis and Optimization of a Nitric Acid Plant 221

M

Macro Porous Polymer Separates Hydrocarbons from Water with Simple, Effective, Dependable Liquid-Liquid Extraction . . . 204

Mass Transfer of Volatile Organics from Large Open Basins. . . . 82

Microbial Sweetening of Sour Natural Gas Using Mixed Cultures 6

Modelling VOC Emissions at Wastewater Drop Structures Acid in No_X/SO_X and Air Toxic . . . 261

N

Nonconvective Movement of VOCs in Moist Soil. 159

O

Oxidation Chemistry of Chloric Acid in Nox/SOx and Air Toxic Metal Removal from Gas Streams 245

P

Process Challenges in Rotary Kiln-Based Incinerators in Soil Remediation Projects 267

Preparation and Evaluation of Adsorbents from Waste Carbonaceous Materials for SO_X and NO_X Removal 12

R

Reducing the Leachable Lead Content of Used Oil Filter Paper 62

Remediating Pesticide Contaminated Soils Using Solvent Extraction 293

Removal of Nitric Oxide from Flue Gas with Iron Thiochelate Aqueous Solution in a Turbu-lent Contact Absorber. 153

Removing a Small Quantity of THT from Gas Storage Groundwater Through Air Stripping and Gas-Phase Carbon Adsorption. 277

S

Scale-Up and Economic Analysis for the Design of Supercritical Fluid Extraction Equipment for Remediation of Soil 112

Soil Washing Enhancement With Solid Sorbents 173

SO2 Oxidation in a Periodically Operated Trickle Bed: Comparison of Activated Carbon Catalysts 239

Stripping of VOCs from Dissolved Air Flotation 73

T

Treatment of Chlorinated Ethanes in Groundwater With Ozone and Hydrogen Peroxide . . . 187

U

Use of Ambersorb Carbonaceous Adsorbent for Removal of BTEX Compounds from Oil-Field Produced Water. 197

W

Waste Minimization by Process Modification 56

Wastewater Treatment: Enhanced Electrochemistry. 122

Subjects

A

Adsorbent 197
Absorber, turbulent contact. . . 153
Activated carbon adsorption . . 128
Adiabatic thin-film evaporation 255
Air
  emissions. 229
  flotation, dissolved. 73
  stripping 277
  toxic metal removal 245
Alternative technologies 69
Ambersorb adsorbent 197
Analysis, environmental 221
Aqueous solution 153

B

Basins, large open 82
Biofilters, VOCs in 148
Biofiltration of odors 141
Biological
  conversion. 234
  elimination 148
Bioreactor
  full-scale 194
  fluid bed 93
  high rate 135
BTEX compounds 197

C

Carbonaceous adsorbent 197
Carbon
  adsorption 277
  fluid bed bioreactor 93
Carver-Greenfield process. . . . 213
Chloric acid 245
Chlorinated
  ethenes 187
  hydrocarbons 38
Chlorobenzene in groundwater 93
Chromium, hexavalent 166
Cultures, mixed 6

D

Data, wet oxidation reactor . . . 48
Decontamination 166
Dehalogenation, reductive 38
Dehydration/solvent extraction 213
Design
  activated carbon adsorption 128
  for pollution control. 69
  of fluid extraction equipment 112
  of UV oxidation system . . . 179
  process 221

Statement of Ownership, Management, and Circulation (required by 39 U.S.C. 3685) of September 30, 1996, for *Environmental Progress* Publication No. 689-390, issued quarterly for an annual subscription price of $195 from 345 E. 47th St.,New York, NY 10017, which is the location of its publication and business offices. The name and address of the Publisher, Editor, and Managing Editor are: Publisher, Stephen R. Smith, 345 E. 47th St., New York, NY 10017; Editor, Gary F. Bennett, 345 E. 47th St. New York, NY 10017; Managing Editor, Maura Mullen, 345 E. 47th St., New York, NY 10017. The owner is: American Institute of Chemical Engineers, 345 E. 47th St., New York, NY 10017. The known bondholders, mortgagees, and other security holders owning or holding one percent or more of the total amount of bonds, mortgages, or other securities are: None. The purpose, function, and nonprofit status of this organization, and the exempt status for federal income tax purpose have not changed during the preceding 12 months. The following figures describe the nature and extent of *Environmental Progress*' circulation. In each category the first number (*in italics*) is the average number of copies of each issue during the preceding 12 months. The number next to it, within parentheses ( ), is the actual number of copies of the single issue published nearest to the filing date. Total number of copies printed (net press run), *4,825* (5,000). Paid circulation: 1. Sales through dealers and carriers, street vendors, and counter sales: None; 2. Mail subscription, *3,868* (3,690). Total paid circulation *3,868* (3,690). Free distribution by mail carrier, or other means; samples, complimentary, and other free copies, *55*(55). Total distribution *3,923* (3,745). Copies not distributed: 1. Office use, left over, unaccounted, spoiled after printing *902* (1,255). 2. Returns from news agents: None. Total *4,825* (5,000). I certify that the statements made by me are correct and complete.
Stephen R. Smith, Managing Director, Publications.
